Born in 1957 in Dugny, Pierre Duclou enrolls his work in a time relationship.

Painter, engraver and sculptor, he expresses himself by the trace and the fragment thus referring us to our own origins.

His dreamlike and timeless universe with shades of blue and ocher, born from a work of painting, drawing, collages, ink, chalk, pastel, charcoal, rust, stamping, paper recycling, paper pulp...and the combination of mixed techniques is highlighted by supports such as paper, jute, postal bags and ceramics.

We will have a double event around the work of Pierre Duclou with at the Parisian gallery a focus on his recent works; and not far away in the alternative hotel FIAP whose hall has just been renovated; a retrospective, with works from the 1990 years to today.

Also, this exhibition will be a prelude to the future monography of the artist Labyrinthes fertiles published by Yunique Gallery and scheduled for June 2025.
